

# CONSTRUCTION ENGINEERING

Construction engineers design and execute the processes for the building and maintenance of structures. The professionals within this sector often possess complex specialisms which have become engineering disciplines in their own right.

Within the construction sector, we provide experts in building materials, design, project management, safety and construction planning. Our construction engineers specialise across a wide range of industries, ready to support on short or fixed-term projects.

Our teams specialise in specific skills and sectors. Whether it is building services and system management, including; heating, ventilation and air conditioning (HVAC), water, power and controls. Or structural engineering; assessing and inspecting developments to ensure structural integrity. We have a diverse candidate pool across the entire spectrum.

## Jobs we recruit for:

Safety Technician  
 Civil engineer  
 Safety engineer  
 Construction engineer  
 Structural engineer  
 Electrical Engineer  
 Master Electrician  
 Safety Technician  
 Service Engineer  
 Construction Manager  
 Project Manager  
 Site Manager
